HARDAZ
RETAINING WALL SYSTEMS

+

+

FOR 50mm & 75mm TIMBER SLEEPERS

+

- Heavy duty galvanised steel for longer life
- No fastening required
- DIY friendly

+

+

HARDAZ Retaining Systems provide a simple and easy solution for creating solid timber retaining walls. Each retaining post ensures a tight and secure fit for each sleeper, with no packing or fastening required.

All **HARDAZ Retaining Systems** products are made from galvanised steel, to guarantee long-life durability and strength.

A recess in each post allows for adjustment to ensure you get the perfect fit every time and to compensate for future timber movement and shrinkage.

Our range suits both 50mm and 75mm wide sleepers and is versatile enough to build walls from one to five sleepers high.
